Summary

Motivated Full Stack Developer with hands-on experience in Python, Django, Django REST Framework, React, and JavaScript. Experienced in developing and deploying full-stack web applications with REST APIs, authentication, databases, and responsive user interfaces. Eager to apply technical skills in a professional environment and continue growing as a developer.

Experience

Full Stack Development Intern — EXPS Technology Center

Aug 2026 – Sep 2026

- Worked on full-stack development tasks using **Django, Django REST Framework, React, and JavaScript**.
- Developed and deployed **Postly** and **Shopora** as part of the internship.
- Implemented REST APIs, authentication, databases, responsive UI, and deployment

Projects

Postly — Social Media Web Application

GitHub: [EXPS Postly](#) | Live Demo: [Postly](#)

- Built a full-stack social media application using Django REST Framework and React, implementing user profiles, posts, likes, comments, follows, notifications, connections, and messaging features.
- Developed and integrated RESTful APIs with secure authentication, authorization, profile management, image uploads, and user-specific social media functionality.
- Deployed the application using Render and Vercel, integrated the React frontend with the Django REST Framework backend, and configured API communication for production use.

Shopora — E-Commerce Web Application

GitHub: [EXPS EcommerceStore](#) | Live Demo: [Shopora](#)

- Built and deployed a full-stack e-commerce application using Django REST Framework and React, implementing product browsing, categories, search, filtering, user authentication, shopping cart, and order management functionality.
- Developed and integrated RESTful APIs for products, categories, users, cart, orders, payments, and customer data, with proper stock validation and order processing.
- Implemented secure authentication, password reset, Stripe payment integration, stock management, and responsive React interfaces, and deployed the application using Render and Vercel.

NewsScope — AI-Powered News Analysis Platform

GitHub: [NewsScope](#)

- Built a full-stack news platform using Django REST Framework and React for discovering, searching, saving, comparing, and analyzing news articles from multiple sources.
- Developed AI-powered news story clustering using Sentence Transformers and NLP techniques to group related articles based on semantic similarity and identify common news stories.
- Implemented media bias analysis using source-level data to compare different coverage perspectives and help users understand how the same story is reported across multiple sources.
- Built and integrated RESTful APIs for news articles, sources, story clusters, saved articles, authentication, search, categories, and personalized content using Django REST Framework.

Education

Virtual University of Pakistan –BS Software Engineering

2021-2025

Govt Degree College for Women, Warburton – FSc Pre-Engineering

2019-2021

Skills

Languages: Python, JavaScript, HTML5, CSS3

Frontend Development: React, Vite, Tailwind CSS, React Router, Axios

Backend Development: Django, Django REST Framework, REST APIs

Databases: PostgreSQL, SQLite, MongoDB

Authentication & Security: Clerk, JWT, Authentication & Authorization

AI / NLP: Sentence Transformers, Text Embeddings, Cosine Similarity, NLP-based Story Clustering

Tools & Technologies: Git, GitHub, Postman, Vercel, Render

Development Practices: Responsive Design, API Integration, Debugging, Problem Solving

Languages

English (Professional) | Urdu (Native)
